MANAGEMENT DISCUSSION AND ANALYSIS

The Global Economy is still struggling especially European countries and America and the effect of this global scenario is slowly affecting Indian economy, the inflation rate is high and the industrial production growth has come down substantially. Although some signs of a downturn are visible in the current year, we will be able to fight back and restore our higher growth.

PERFORMANCE:

The current financial year is for 6 months and the company has improved its turnover, especially on export front and has shown improvement. Despite maintaining its turnover, the company recorded a loss in the year that has been due to various factors such as rising cost of material, slackness in the market, depreciation of the rupee resulting in higher costs of imports, escalating fuel, inflation and slow growth in the economy has a negative impact on the performance of the company. In spite of all these challenges your Company has withstood the pressure and reported comparatively better business.

INTERNAL CONTROL SYSTEM:

The Company has appropriate internal control systems for business processes with regard to its operations, financial reporting and compliance with applicable laws and regulations.

HUMAN RESOURCE MANAGEMENT

Your Company has valued both experience and fresh talent, and takes pride in the commitment, competence and dedication shown by its employees in all areas of business and is conscious of the importance of environmentally clean and safe operations. Upgradation of technical skills training is periodically given to employees as per identified requirements while employees are encouraged to participate in personality development, soft skills enhancement programmes etc. especially for the marketing and technical staff.

RISK MANAGEMENT:

The Risk Management and Control Systems are considered to be in balance with Indokem's risk profile and appetite, although such systems can never provide absolute assurance. Indokem's Risk Management and Control Systems are subject to continuous review and adaptations in order to remain in balance with its growing business size and changes in its risk profile.

SAFE HARBOUR CLAUSE:

Statements in the Management Discussion and Analysis describing the Company's objectives and expectations may be "forward looking statement" within the meaning of applicable securities laws and regulations. These statements are based on certain assumptions and reasonable expectation of future events. Actual results could however differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include, among others, economic conditions affecting demand/ supply, price conditions in the domestic and overseas market in which the Company operates, changes in the Government regulations and tax structure, economic developments within India and the countries with which the Company has business contacts and other factors such as litigation and industrial relations.

CONCLUSION:

Though the company cannot assess its success on short term profits and financial performance is the main factor to overall success, we with entire system are keen in improving our performance of every individual employee just as much as we are doing for improving our every product.
